

26 September 2022

Dear Residents and Representatives,

Since the last update, we have identified several additional cases at the Dr Mary Surveyor Centre. There were 3 cases on Darch and 1 case on Perry identified last evening, with those residents tested due to displaying mild symptoms. In addition to those cases, a further 5 cases have been identified through screening residents at the Centre this morning using RAT.

**The current active caseload is now 15 residents: 10 residents from Darch and 5 residents from Perry.** Of the affected residents – 1 resident has been transferred to hospital, 2 residents have mild symptoms, and 12 residents are asymptomatic.

Thank you for your assistance during the early stages of this outbreak. We will provide further updates with changes in the situation.

With best wishes,

**Chris Roberts**  
Chief Executive Officer
